 - 4.1 馬偕紀念醫院台東院區(089)310150 轉檢驗科297

Sputum culture examination

2023/07/01

1 Steps and notes for the collection of sputum specimen for culture

- 1.1 Please rinse the mouth with water. Then cough the sputum into the container provided by the laboratory. It has more clinical significance to have the first-time sputum after wake up.
- 1.2 While collecting the sputum, it is necessary to cough up harder from the deep part of lungs. Please avoid mixing with large amount of saliva.

2 Steps of sputum collection for TB culture and AFB stain

- 2.1 Please rinse the mouth with water. Then cough the sputum into the rocket-shaped centrifuge tube provided by the laboratory. It has more clinical significance to have the first-time sputum after wake up.
- 2.2 While collecting the sputum, it is necessary to cough up harder from the deep part of lungs. Please avoid mixing with large amount of saliva. Since the amount of sputum specimen in 5-10 ml is required, please make sure the amount of sputum specimen reach the level demonstrated as the figure. Avoid excessive or deficient amount that may affect the results.
- 2.3 If you need to have one specimen per day for 3 days. Please collect and send them separately. Do not send the sputum of 3 days together which will affect the screen quality.
- 2.4 After collection of specimen, send the specimen and examination form to the laboratory. If immediate transfer not available, please place the specimen in the refrigerator(2-8°C), then send on the next day.

3 Time and location to send
